## Education

**Princeton University, Princeton, NJ** 09/2020 – Present

*B.S.E in Electrical & Computer Engineering, Expected Graduation Date: May 2024*

GPA: 3.93/4.00

Minor: Applications of Computing (CS), Statistics & Machine Learning

Relevant Coursework: Data Structures & Algorithms, Systems Programming, Logic Design, Introductory Java Programming, Power Electronics, Electronic Circuit Design

## Experience

**Princeton University Computer Science Department** – Course Grader 09/2021 – Present

- Grading students programming assignments for COS226, the Data Structures and Algorithms course taught at Princeton.
- Evaluating programming assignments for code correctness, efficiency, and style.

**Khan's Tutorial** – 8th Grade Instructor 11/2020 – Present

- Teaching 8th grade mathematics and writing to prepare students for the New York State Common Core examination and improving students' performance at school.
- Grading students' classwork and diagnostic exams to give feedback and track progress.

**Centers for Disease Control and Prevention** – Data and Program Evaluation Intern 06/2021–08/2021

- Extracted and abstracted data from CDC career program selection reports for reporting the effectiveness of current selection measures and strengthening future selection.
- Generated visuals, graphs, tables using Excel for first draft of the Division's Selection Report.
- Worked on a content inventory and cataloging all contents on Science Office SharePoint website for improving user experience and UX design.

**Princeton University Office of Information Technology** – Closed Captions Editor 09/2020–05/2021

- Closed captioned videos (content such as lectures, talks, guest speeches) posted on Princeton's Media Central website to ensure correct readability.
- Worked on external website census project to manually identify and sort out hundreds of Princeton affiliated website links which were old and non-functioning.

## Leadership

**Princeton Rocketry Club** – Electrical Subteam Lead 09/2020 – Present

- Leading the design of the electrical components placed in an L1 rocket payload and implementing sensors to track altitude, temperature, and pressure of our rocket in flight.
- Teaching team the basics of Python programming, Raspberry Pi, Arduino, PCB design.

## Skills

**Programming**: Java, C, Python, HTML, CSS, Javascript, Git/Github, R/RStudio, Verilog, Microsoft Office
